

Ccna scenario labs pdf

Mr PJ (fictitious patient) presents as a transfer to your dialysis unit, on maintenance hemodialysis for chronic kidney failure secondary to hypertension for 9 months. He is 58 years old, married, currently unemployed but does 6 hours of volunteer work each week. Weight 65 kg; Height 5'10".

Current transfer MBD medications are: Calcium-containing binder prn.

Only last month's laboratory values have been included in his transfer paperwork.

Utilizing Guideline update 4.1.1, laboratory values will be evaluated from the last three months rather than the current month alone. This KDIGO guideline recognizes treatments of CKD-MBD should be based on serial assessments of phosphate, calcium and PTH levels considered together rather than focus on individual values.

The following laboratory values are now available for renal team evaluation.

Monthly Labs	Current month	1 month ago	2 months ago	KDIGO Goal
Phosphorus (mg/dL)	6.1 (1.97)	5.9 (1.90)	5.8 (1.87)	Trend to normal
Corrected calcium (mg/dL)	9.6 (2.40)	9.5 (2.37)	9.0 (2.25)	Avoid hypercalcemia
Quarterly labs				
PTH intact (pg/mL)	459 (48.67)	400 (42.42)	380 (40.30)	Monitor PTH trends

Ccna test topics. Does ccna exam have lab. Ccna security exam topics. Ccna lab examples. Ccna scenario labs pdf.

Are you interested in setting up your very own CCNA Home Lab so you can get all the benefits of learning the right way, on real equipment? Are you trying to get every advantage to pass the new CCNA 200-301 exam on the FIRST try? Then, you are in the right place! Click HERE to go right to our recommended Cisco CCNA Lab Kits or Click HERE to learn about our CCNA lab suggestions. Here you will find various Cisco CCNA 200-301 labs we have decided to provide FREE to you! These labs are just the tip of the iceberg of what you can expect to find in much more detail inside our time proven CCNA Lab Workbook that has helped thousands achieve their certification. The labs in the full lab workbook go into a complete deep dive on all the CCNA concepts and real world scenarios you need to understand to not only pass the text, but also succeed in the field. The labs on this page will give you a great start as an introduction to CCNA and if you like these, we know you will absolutely love the full content inside the 450+ page CCNA Certification Kits Cisco Lab Workbook. We also offer an entire range of CCNA Training Materials that will cover you from every angle. These cover all of the theory, subnetting, labs, practice exams, etc. that you will need to blast through the CCNA exam! Our CCNA study value pack puts all of these together with budget price savings! Cisco Packet Tracer 8.1 is a powerful network simulator for CCNA and CCNP certification exam training allowing students to create networks and almost unlimited numbers of devices and to experience troubleshooting without having to buy real CiscoTM routers or switches! Cisco® Tracer features an array of simulated routing & switching protocols (EIGRP, OSPF, BGP, etc.) to simulate network traffic. It also includes Cisco IOS 15.1 and later feature sets, wireless capabilities with WLC and lightweight access points, security deployment, ASA 5500 and 500-X firewalls, and SDN controller. Bonus to interceptCCS Errors & Errors to InterceptCCS Error & Error Videos is provided courtesy of Cisco Press. Date: Jan 17, 2014. Lab 1-1Configuring Router Components and Accessories Lab 1-2Configuring a Cisco Router or Switch via Console Lab 1-3Identifying Router & Switch IOS Software Lab 1-4Configuring a Cisco Firewall Lab or feedback, please email: simulator@certexams.com Looking to learn how to build a CCNA Lab to help you pass your exam the FIRST time? Then you are in the right place. Click here to go right to the CCNA Kits or click the link below to learn how to build an awesome home CCNA Lab! In this section you will find various Cisco CCNA labs we have created to provide for free. These are labs that were created that we just did not feel were good enough to put in our CCNA lab workbook. They are either not complex enough, do not cover multiple concepts or do not have enough commentary explaining what we want to accomplish in each lab and why you are doing each step. These are basically just simple configurations and not what we would really call labs. Why? Because they do not really help you learn. But we figured instead of throwing them out, we would post them here and let people use them. Please keep in mind these are the labs we rejected and not of the same quality that is in our lab workbooks. The labs in our CCNA lab workbook are much more complex with topical background, explanations and then review questions.
